SUMMARY

Full-Stack Web Developer with over 4 years of experience in SaaS enterprise product development. Proficient in React.js and Next.js for dynamic frontend solutions, and skilled in Node.js (Nest.js) for robust backend systems. I have strong problem-solving abilities and meticulous attention to detail, combined with a deep understanding of Agile methodologies, enabling me to drive streamlined and efficient project execution and delivery.

I am seeking a remote or on-site role that not only leverages my expertise in crafting user-centric web applications but also offers a stable and long-term work environment where I can contribute to and grow with the team.

EXPERIENCE

Full Stack Web Developer, Core Team

10/2023 - 11/2024

Fulliin Inc. ↗

Fulliin is an e-commerce platform with a no-code E-shop builder and advanced tools for budgeting, invoicing, and reporting.

As a key contributor to the core team, I had the privilege to:

- Built a drag-and-drop online stores builder using Next.js and Craft.js, delivering the product within a 2 months timeline.
- Developed a real-time order management dashboard with third-party delivery API integration in 7 days.
- Implemented Meta Pixel and Google Analytics for actionable insights, boosting conversions by up to 27%.
- Built customizable reporting tools, reducing report generation time by over 95% from 30 minutes to just a few seconds.
- Built a secure authentication and authorization system with role-based access for collaborative admin workflows.
- Integrated Google Sheets API for real-time order management and synchronization, reducing manual data entry by 90%.
- Added custom domain integration, increasing user engagement by 35%.
- Enabled media uploads to AWS S3 for efficient and scalable storage.
- Deployed backend with SSL and Nginx using Docker in 3 days.

Software Engineering Consultant

04/2023 - 10/2023

Intelifox ↗

Intelifox creates custom software solutions for global clients such as General Energy and SABEO France. During my time there, I contributed to the development of the Ila26.fr platform and some of my achievements during my tenure are :

- Stripe Integration: Implemented subscription and refund systems, cutting client onboarding time by 90%.
- Social Feed Features: Delivered advanced features like post/poll sharing, groupe creation, user/group following in 2 weeks.
- Open Source Customization: Adapted components, cutting development time by 40%.

Software Developer

12/2020 - 11/2022

Micro Club ↗

Micro Club is Algeria's top scientific club at the largest university, fostering student engagement with technology through events and workshops. As a software developer at MC, some of my key achievements include:

- Delivered a custom software solution that streamlined financial management, reducing time and effort by 25%.
- Developed an app for event check-ins and generating QR code tickets, cutting check-in time by over 70%
- Contributed to organizing Capture The Flag 2021, developing competition topics and judging criteria for 150+ participants.

EDUCATION

International Business Management

Uniwersytet WSB Merito Toruń - undergraduate

2024 - Present

Computer Science

USTHB - Completed coursework, degree not finalized.

2020 - 2022

Leadership and Entrepreneurship

University of Reno, Nevada - AYLP Exchange Program

2019

SKILLS

Serverless Architecture

System Architecture and Design

Event-Driven Architecture

Message Queue Systems (Kafka, RabbitMQ)

RPC Frameworks (tRPC)

RESTful API Design

GraphQL

WebSockets & Real-time Communication

SQL and NoSQL Databases

Authentication and Authorization

Server-Side Programming

Deployment and Hosting (Docker)

Problem-Solving and Debugging

Front-end Development

Data Visualization

Version Control (Git)
